Kartik R Mathur

4+ years of experience in **Java, Kotlin**

Email: kartiksmathur@gmail.com | LinkedIn : linkedin.com/in/kartikrmathur | Phone: +91-7014208409 |
Portfolio: https://kartikmathur.netlify.app

Summary

Software Engineer Building robust, scalable backend systems with 4+ years of hands-on experience. Specialized in microservices architecture, cloud-native applications on Azure, and enterprise system integration. Expert in Spring Boot, Docker, Kubernetes, and modern DevOps practices.

Experience

Deloitte Touche Tohmatsu India LLP — Gurugram, Haryana

Software Engineer — Aug 2025 – Present

Java Backend

- Engineered **ABDM M1 API integration** (national healthcare system), automating **patient data exchange** between systems and ensuring compliance with government healthcare data standards.
- **Built secure user management modules for a healthcare portal using Spring Boot, implementing JWT-based authentication and role-based access control (RBAC) to enforce data privacy and access compliance**
- Designed and implemented **layered REST APIs** (Controller → Service → Repository) using **Spring Boot**, ensuring clean separation of concerns and maintainable, production-grade code.
- Optimised **Hibernate/JPA queries** and applied database-level tuning to significantly reduce data retrieval latency – improving overall application responsiveness for healthcare workflows.
- Enforced **transaction management** and structured **exception handling** to guarantee data consistency and integrity across critical patient data operations.

Tata Elxsi — Bengaluru, Karnataka

Software Engineer — Sep 2024 – Aug 2025

Java Backend

- Architected and developed **scalable backend services** using **Java 17** and **Spring Boot 3.2.4** to power content delivery across **17+ TV channels** and the Shahid VIP streaming platform.
- Engineered **high-throughput REST APIs handling 500K+** concurrent user requests with **sub-100ms latency**, ensuring reliable performance at scale.
- **Designed PostgreSQL schemas** for multi-language user preferences and implemented **Elasticsearch** for fast metadata retrieval across Arabic, Farsi, and English content – enabling seamless content discovery **for MBC Group's 50M+ global audience**.
- Implemented a **Redis distributed caching layer** for Shahid streaming metadata and channel EPG data, **reducing database round-trips by 70%** and cutting average content **load time during peak viewing hours**.
- Led technical collaboration with MBC Studios and Shahid development teams to define backend requirements for premium content; architected **Kafka-driven event workflows** to synchronise **real-time content updates** across platforms.
- Drove **end-to-end delivery** as **backend module owner across 3 major releases** – managing Agile sprints in Jira, **maintaining 90%+ test coverage**, and **achieving zero-downtime deployments** via blue-green release strategy serving millions of users.

Jio — Bengaluru, Karnataka

Software Engineer — Mar 2022 –Sep 2024

(Kotlin, Java, Android SDK, Jetpack, Firebase, AI/ML, Jio Design System)

- High-Scale Systems Experience: Contributed to applications serving 125M+ users during major events, gaining practical understanding of scalable system design.
- Data Processing & Algorithms: Implemented AI-driven recommendation systems using TF-IDF/NLP concepts for personalized content delivery.
- Systems Optimization: Engineered 120% improvement in download performance through advanced algorithms (parallel/torrent-based downloads).
- Security Implementation: Built client-side security features including rate limiting and fraud detection mechanisms.

Celebal Technologies Jaipur, Rajasthan

Software Engineer July 2021- Mar 2022

(Kotlin, Java, Android SDK, Jetpack Components (ViewModel, LiveData, Room), REST APIs, Firebase, Azure)

- **Architected Backend Solutions**: Developed RESTful APIs using **Spring Boot** and **Java** for enterprise Android applications, following MVC/MVVM patterns.
- **Cloud Integration:** Deployed scalable backend services on **Azure**, integrating data pipelines using **Azure Data Factory** and Databricks to support large-scale data synchronization and processing.
- **Improved Data Handling**: Optimized SQL queries and database schema design (MySQL/PostgreSQL), reducing API response times by 30%.
- **Automated Workflows**: Streamlined CI/CD pipelines with Docker and Kubernetes for microservices deployment, cutting release cycles by 20%.

Internship

Baltech Technologies Jaipur, Rajasthan

iOS Developer May 2018 – Aug 2018

(iOS, Swift, Xcode, Cocoapods)

- Sole developer for setting up iOS application to help restaurant streamline order placement and delivery services and reduce turnaround time by 70%
- Developed a User-friendly UI to restaurant customers to place order and make payments through apple pay. Allows scan QR code and navigate user to nearest restaurant.
- The application was developed utilizing GraphQL, Xcode and SWIFT, compatible to run on all iOS-based devices

Cetpa Infotech Pvt Noida, India

Android Developer Jan 2018 – Apr 2018

(Kotlin, Java, Android SDK, Jetpack, REST APIs, Firebase, Azure)

- Project: Set up a Job Portal for both Job seekers and recruiters
- Created an Android app in Kotlin where recruiters can place the job openings and job seekers can search for the relevant jobs Used MVVM architecture for creating the app.

Projects

JournalApp [MITRC]

(Java, SpringBoot, REST APIs, OAuth2 Authentication, Maven, Git)

- Engineered a **Spring Boot–based journal management system**, exposing RESTful APIs for creating and managing user journal entries.
- Implemented **secure authentication and authorization using Spring Security with OAuth2**.
- Documented APIs using **Swagger/OpenAPI**, enabling interactive API testing and improving developer integration.
- Implemented **environment-based configuration management** to support scalable deployment across multiple environments.
- Built a **CI pipeline with GitHub Actions** to automate builds and ensure code validation on every commit.

Education

Year	Degree/Certification	Institution
2019	B.Tech in Computer Science	M.I.T.R.C Alwar (Rajasthan) Rajasthan Technical University
2015	Higher Secondary (AISSCE) from Central Board of Secondary Education	kendriya vidyalaya – 1, Alwar (Rajasthan)
2013	Secondary School from Central Board of Secondary Education	kendriya vidyalaya – 1, Alwar (Rajasthan)

Technical Skills

Backend & Frameworks	Cloud & DevOps	Data & APIs	Security & Tools
Java 21 JavaScript Spring Boot Spring WebFlux Spring MVC Spring Batch Spring Security	Microsoft Azure Docker Kubernetes Azure AKS GitHub Actions CI/CD Maven	PostgreSQL MySQL SQL Server IBM DB2 JPA/Hibernate REST API GraphQL SOAP Azure Service Bus	OAuth2 JWT Azure AD Git & GitHub Datadog Kibana IntelliJ IDEA Jira

Strengths

- Strong problem-solving skills with focus on root-cause analysis
- Clear communication of complex technical concepts to non-technical stakeholders
- Effective collaboration within cross-functional Agile teams

Certification

- Application Development in Java – Coursera
- Java Data Structure & Algorithms + LeetCode Exercise - Udemy

Other Experiences and Achievements

- Speaker at Seminar on AR Kit and Neural Nets: Shared information with audience on how AR Kit and Neural Nets can be utilized to add comfort in day-to-day life through examples like augmented reality, mood recognition
